

Renewable energy index

The latest issue (number 3) of the *Australian Renewable Energy Resources Index* (ARERI) is now available. It gives a complete index of all papers published in Australia, or by Australian authors in overseas publications, dealing with renewable energy resources. These embrace solar energy; wind energy; ocean wave, thermal, tide, and current energy; hydro-electric energy; geothermal energy; and renewable fuels. Nuclear energy and fossil fuels are excluded.

The entries, which are assembled in classified categories, cite author, title, and bibliographical details. Author and subject indexes are provided. The Index is available on 48x microfiche from CSIRO, P.O. Box 89, East Melbourne, Vic. 3002 — cost, \$5.
