

ECOS

Number 37

Spring 1983

Fire and rainforest in Tasmania	3
Weighing our energy options	9
A new wicket at the MCG	14
Exploiting monoclonal antibodies	16
Native plants facing extinction	21
<i>Spectrum</i> — Less pollution, and a useful by-product — Root-warming saves energy — Coal formation and Australia's drift north	27
Letters	31
<i>Back box</i> — Nymphs in the rainforest	32

Ecos describes CSIRO research findings of relevance to our environment and related findings by other researchers. Articles are based on reports, published papers, and information obtained by interviewing scientists.

Technical inquiries should be sent to the CSIRO Divisions concerned. All other correspondence should be addressed to: The Editor, *Ecos*, P.O. Box 225, Dickson, A.C.T. 2602.

Material in *Ecos* may be reproduced; acknowledgement of both CSIRO and *Ecos* is requested.

Subscribe for just \$7 a year.

Increased costs have made it necessary to increase the *Ecos* subscription rate, which has been held at \$5 since 1979. Subscription orders should be sent to the subscription agency, R. Hill and Son Ltd, 608 St Kilda Road, Melbourne, Vic. 3004, with your cheque (\$7 for four issues) made out to 'R. Hill and Son Ltd'.

Current and back issues are available for \$2.00 each (cheques made out to 'The Collector of Moneys, CSIRO') from the CSIRO Editorial and Publications Service, P.O. Box 89, East Melbourne, Vic. 3002.

Ecos is produced quarterly by the Science Communication Unit of CSIRO's Bureau of Scientific Services.

Editor: Robert Lehane

Writers: Andrew Bell, Steve Davidson, and Wayne Ralph
